DR. FRASMUS WALSON, an eminent London physician, has taken on himself the charges of conveying the obelisk known as Cleopatra's needle from Alexandria to London. He has made the necessary arrangement with Mr. Dickson, a well known civil engineer, at an estimated cost of \$50,000. The obelisk will be surrounded with water tight and air tight casing of boiler plates, will have a wooden keel and an iron deck and will be towed through the Mediterranean by a powerful steamer.

Which of five snowdrops would the moon Which of hve snowdrops would the moon
Think whitest, if the moon could see?
Which of five rosebuds flushed with June
Were reddest to the mother-tree?
Which of five birds, that play one tune
On their soft shining throats may be
Chief singer? Who will answer me?

Would not the moon know, if around One snowdrop any shadow lay?—
Would not the rose-tree, it the ground
Should let one blossom droop a day?
Does not the o.e bird take a sound
Into the cloud, when caught away,
Finer than all the sounds that stay?

Whose yellow head, its restless shine
Brightened the butterflies last year!
Whose pretty hands may intertwine
With paler hands unseen but near;
You are my favorite now, I fear.
